Re: AFE(2026)5804 entitled "Testing the wind disruption and disturbance refugia hypothesis for mountain pine beetle outbreaks (*Dendroctonus ponderosae*)" by Murphy, Seamus

Dear Dr. Murphy,

Manuscript ID AFE(2026)5804 titled "Testing the wind disruption and disturbance refugia hypothesis for mountain pine beetle outbreaks (*Dendroctonus ponderosae*)", which you submitted to Agricultural and Forest Entomology, has been reviewed.

I agree with the Associate Editor that the manuscript is within the scope of AFE, but the Introduction and Discussion need to be thoroughly revised to include existing literature. In addition, the novelty of the study needs to be explicitly stated since numerous modelling papers are submitted to AFE and we have limited room.

Following the advice of the Associate Editor and because I think the topic of your paper is an important one, I am prepared to consider a resubmission as a new manuscript.

When you resubmit, please address the Associate Editor's comments and write to me explaining what you have done.

Our journal is currently transitioning to Wiley's Research Exchange submission portal. Please read these instructions carefully.

If you submitted your manuscript through our Research Exchange site, you will see a link below to submit your revised manuscript: <https://submission.wiley.com/submissionBoard/1/aede2cc9-345a-4d77-8d67-a6c54ef9d5ae/current> (If no link appears, follow the instructions in the next paragraph.)

Click on the link or go to submission.wiley.com/journal/AFE. Sort by journal and submission status to locate this manuscript, then click the "Revise submission" button to submit your revision. You will be able to respond to the reviewer comments when asked to "Upload your Author Response". All supplementary and additional files will be carried over when you submit a revised manuscript. You may be required to provide additional files at the revision stage.

If you submitted your manuscript through ScholarOne, please use this link to submit your revised manuscript: https://submission.wiley.com/submission/submissionBoard/##DOCUMENT_ID_EXTERNAL##/current?idtype=external Click on the link or go to <https://mc.manuscriptcentral.com/afe> and enter your Author Center, where you will find your manuscript title listed under "Manuscripts with Decisions." Under "Actions," click on "Create a Revision". You will be able to respond to the comments made by the reviewer(s) in the space provided. Your original files are available to you when you upload your revised manuscript. Please delete any redundant files before completing the submission.

Wiley Editing Services Available to All Authors

Should you be interested, Wiley Editing Services offers expert help with manuscript, language, and format editing, along with other article preparation services. You can learn more about this service option at www.wileyauthors.com/eoo/preparation. You can also check out Wiley's collection of free article preparation resources for general guidance about writing and preparing your manuscript at www.wileyauthors.com/eoo/prepresources.

This journal offers a number of license options for published papers; information about this is available here: <https://authorservices.wiley.com/author-resources/Journal-Authors/licensing/index.html>. The submitting author has

confirmed that all co-authors have the necessary rights to grant in the submission, including in light of each co-author's funder policies. If any author's funder has a policy that restricts which kinds of license they can sign, for example if the funder is a member of Coalition S, please make sure the submitting author is aware.

IMPORTANT: Your original files are available to you when you upload your resubmitted manuscript. Please delete any redundant files before completing the submission.

Sincerely,

Christopher Ranger
Editor-in-Chief, Agricultural and Forest Entomology

Agricultural and Forest Entomology is a journal of the Royal Entomological Society. For more information about our portfolio of journals, please visit <http://www.royensoc.co.uk/publications/index.htm>

Associate Editor: MacQuarrie, Chris

Comments to the Author:

I am of the opinion that the scientific component of the manuscript is sufficiently explained and presented such that it is acceptable to be sent for peer review by AFE. I am, however, concerned that the arguments in the introduction and discussion are not well supported or linked to the (admittedly vast) literature on MPB. I have some familiarity with this system and I feel that this would be a significant impediment for most reviewers familiar with this system.

For that reason I am recommending that the Editors return the manuscript to the author with an invitation to resubmit following revision. I would encourage the author to pay particular attention to developing the argument in the discussion. My initial impression is that the Discussion reiterates what has already been stated in the results. Their revised discussion should link the author's findings to the biology, ecology or management of the MPB system.

I look forward to reading the author's revised manuscript.
