

JOURNAL OF APPLIED ENTOMOLOGY

Author Guidelines

Sections

1. [Aims and scope](#)
2. [Article Types](#)
3. [Submission and Peer Review Process](#)
4. [After Acceptance](#)

1. Aims and scope

The *Journal of Applied Entomology* publishes original articles on current research in applied entomology, including mites and spiders in terrestrial ecosystems. Research on stored product pests will be also accepted. The language of publication is English. All manuscripts are evaluated in a peer-review process.

Wiley's policy on confidentiality of the review process is [available here](#).

Submit your next manuscript for rapid publication: the average time is currently 6 months from submission to publication. With *Journal of Applied Entomology's* dynamic article-by-article publication process, *Early View*, fully peer-reviewed and type-set articles are published online as soon as they complete, without waiting for full issue compilation.

2. Article Types

3. Submission and Peer Review Process

New submissions should be made via the [Wiley Authors submission portal](#). You may check the status of your submission at any time by logging on to submission.wiley.com and clicking the “My Submissions” button. For technical help with the submission system, please review our FAQs or contact submissionhelp@wiley.com.

Authors should kindly note that submission implies that the content has not been published or submitted for publication elsewhere except as a brief abstract in the proceedings of a scientific meeting or symposium.

Pages Charges

There are no charges / fees for publishing pages except for printed colour figures (see [Figures submitted in colour](#) below).

ORCID

The submission system will prompt submitting authors to provide an Open Researcher and Contributor ID (ORCID) to help distinguish their work from that of other researchers.

Submission without an ORCID iD for the submitting author will not be processed further.

Submitting authors must associate their ORCID iD with their account themselves. [Here](#) you'll find the instructions on how to associate your ORCID ID.

In addition, co-authors may choose to provide their ORCID iD – this must be done by each author themselves by associating their ORCID iD with their ScholarOne account as per the instructions for submitting authors.

Free Format submission

Journal of Applied Entomology offers [Free Format submission](#)

Official Publication of
the German Society of
General and Applied
Entomology

[Posts by JApplEntomol](#)

for a simplified and streamlined submission process.

Before you submit, you will need:

- Your manuscript: this should be an editable file including text, figures, and tables, or separate files—whichever you prefer. All required sections should be contained in your manuscript, including abstract, introduction, methods, results, and conclusions. Figures and tables should have legends. Figures should be uploaded in the highest resolution possible. If the figures are not of sufficiently high quality, your manuscript may be delayed. References may be submitted in any style or format, as long as it is consistent throughout the manuscript. Supporting information should be submitted in separate files. If the manuscript, figures or tables are difficult for you to read, they will also be difficult for the editors and reviewers, and the editorial office will send it back to you for revision. Your manuscript may also be sent back to you for revision if the quality of English language is poor.
- An ORCID ID, freely available at <https://orcid.org>. *(Why is this important? Your article, if accepted and published, will be attached to your ORCID profile. Institutions and funders are increasingly requiring authors to have ORCID IDs.)*
- Your co-author details, including affiliation and email address. *(Why is this important? We need to keep all co-authors informed of the outcome of the peer review process.)*
- Statements relating to our ethics and integrity policies, which may include any of the following *(Why are these important? We need to uphold rigorous ethical standards for the research we consider for publication):*
- The title page of the manuscript, including:
 - data availability statement
 - funding statement
 - conflict of interest disclosure
 - ethics approval statement
 - patient consent statement
 - permission to reproduce material from other sources
 - clinical trial registration

Article Preparation Support

Wiley Editing Services offers expert help with English Language Editing, as well as translation, manuscript formatting, figure illustration, figure formatting, and graphical abstract

Volume 122, Issue
4
August 2026

Cover Letter

Cover letter is not mandatory; however, it may be supplied at the author's discretion.

Parts of the Manuscript

The manuscript should be submitted in separate files: Title page, main text file; figures; tables.

Title Page

The title page should contain:

1. A brief informative title containing the major key words.
The title should not contain abbreviations (see Wiley's best practice SEO tips);
2. A short running title of less than 40 characters;
3. The full names of the authors;
4. The author's institutional affiliations where the work was conducted, with a footnote for the author's present address if different from where the work was conducted;
5. Acknowledgements (including funding information).

Funding

You should list all funding sources in the Acknowledgements section. You are responsible for the accuracy of their funder designation. If in doubt, please check the Open Funder Registry for the correct nomenclature:

<https://www.crossref.org/services/funder-registry/>.

Main Text File

Manuscripts can be uploaded either as a single document (containing the main text, tables and figures), or with figures and tables provided as separate files. Should your manuscript reach revision stage, figures and tables must be provided as separate files. The main manuscript file can be submitted in Microsoft Word (.doc or .docx) or LaTeX (.tex) format.

If submitting your manuscript file in LaTeX format via Research Exchange, select the file designation "Main Document – LaTeX .tex File" on upload. When submitting a Latex Main Document, you must also provide a PDF version of the manuscript for Peer Review. Please upload this file as "Main Document - LaTeX

PDF.” All supporting files that are referred to in the Latex Main Document should be uploaded as a “LaTeX Supplementary File.”

Your main document file should include:

- A short informative title containing the major key words. The title should not contain abbreviations;
- The full names of the authors with institutional affiliations where the work was conducted, with a footnote for the author’s present address if different from where the work was conducted;
- Acknowledgments;
- Abstract unstructured;
- Up to six keywords;
- Main body: formatted as Introduction, Materials and Methods, Results, Discussion (each separately). A Conclusions section is optional.
- References;
- Tables (each table complete with title and footnotes);
- Figure legends: Legends should be supplied as a complete list in the text. Figures should be uploaded as separate files.

Title page, main text file, figures, tables and supporting information should be supplied as separate files. Provision of all these sections is mandatory at the submission stage.

Abstract

Please provide an abstract of no more than 300 words containing the major keywords.

Keywords

Please provide six keywords. These keywords should not include words in the title.

Main Text

The main text should consist of the following sections: Introduction, Materials and Methods, Results, Discussion (each separately). A Conclusions section is optional.

The journal uses British spelling; however, authors may submit using either option, as spelling of accepted papers is converted during the production process.

Footnotes to the text are not allowed and any such material should be incorporated into the text as parenthetical matter.

Conflict of Interest

Authors are required to provide a Conflict of Interest statement during the submission process. All authors should disclose any potential sources of conflict of interest. Any interest or relationship, financial or otherwise, that might be perceived as influencing an author's objectivity is considered a potential source of conflict of interest. These must be disclosed when directly relevant or indirectly related to the work that the authors describe in their manuscript. Potential sources of conflict of interest include, but are not limited to, patent or stock ownership, membership of a company board of directors, membership of an advisory board or committee for a company, and consultancy for or receipt of speaker's fees from a company. The existence of a conflict of interest does not preclude publication in this journal. If the authors have no conflict of interest to declare, they must also state this at submission. Submitting authors should ensure they liaise with all co-authors to confirm agreement with the final statement. The Conflict of Interest statement should be included as part of the main text file.

Author Contribution

For all articles, the journal mandates CRediT (Contribution Roles Taxonomy), for more information please see [Author Services](#). **Please insert author contribution in the manuscript above references.**

Contributions from anyone who does not meet the criteria for authorship should be listed, with permission from the contributor, in an acknowledgements section. Financial and material support should also be mentioned. Thanks to anonymous reviewers are not appropriate.

Correction to authorship

In accordance with [Wiley's Best Practice Guidelines on Research Integrity and Publishing Ethics](#) and the [Committee on Publication Ethics' guidance](#), *Journal of Applied Entomology* will allow authors to correct authorship on a submitted, accepted, or published article if a valid reason exists to do so. All authors – including those to be added or removed – must agree to any proposed change. To request a change to the author list, please complete the [Request for Changes to a Journal Article Author List Form](#) and contact either the journal's editorial or production office, depending on the status of the article. Authorship changes will not be considered without a fully completed Author Change form. Correcting the

authorship is different from changing an author's name; the relevant policy for that can be found in [Wiley's Best Practice Guidelines](#) under "Author name changes after publication."

Data Sharing and Data Availability Statement

This journal mandates data sharing, and authors are required to provide a data availability statement at the submission stage, including a link to the repository where your data is stored. Review [Wiley's Data Sharing policy](#) where you will be able to see and select the data availability statement that is right for your submission. **Alternatives, e.g. that data be made available on request or uploaded as supplementary files, are not accepted.** Exemptions are possible when no original data are used (i.e. Review Articles, Perspectives, etc.). **Please insert data link with a DOI in the manuscript above references.**

If authors choose to use the [Dryad](#) data repository, Wiley will pay the archiving charges on your behalf if your paper is published in *Journal of Applied Entomology*. If you use Dryad, please include the "Private for Peer Review" link in your data availability statement (and cover letter if supplied) to make your data accessible to reviewers.

A link to your data must be included in your Data Availability Statement.

Data Citation

Please review [Wiley's Data Citation policy](#).

References

References should be prepared according to the Publication Manual of the American Psychological Association (6th edition). This means in text citations should follow the author-date method whereby the author's last name and the year of publication for the source should appear in the text, for example, (Jones, 1998). The use of et al is determined by the number of authors and whether it is the first time a reference has been cited in the paper:

- articles with one or two authors include all names in every in-text citation;
- articles with three, four, or five authors include all names in the first in-text citation but are abbreviated to the first author name plus et al. upon subsequent citations;
- articles with six or more authors are abbreviated to the first author name plus et al. for all in-text citations.

The complete reference list should appear alphabetically by name at the end of the paper. A sample of the most common entries in reference lists appears below. Please note that a DOI should be provided for all references where available. For more information about APA referencing style, please refer to the . Please note that for journal articles, issue numbers are not included unless each issue in the volume begins with page one.

Tables

Tables should be self-contained and complement, not duplicate, information contained in the text. They should be supplied as editable files, not pasted as images. Legends should be concise but comprehensive – the table, legend, and footnotes must be understandable without reference to the text. All abbreviations must be defined in footnotes. Footnote symbols: †, ‡, §, ¶, should be used (in that order) and *, **, *** should be reserved for P-values. Statistical measures such as SD or SEM should be identified in the headings.

Figure Legends

Legends should be concise but comprehensive – the figure and its legend must be understandable without reference to the text. Include definitions of any symbols used and define/explain all abbreviations and units of measurement.

Figures

Figures should be supplied as separate files. You should review the [basic figure requirements](#) for manuscripts for peer review, as well as the more detailed post-acceptance figure requirements. View [Wiley's FAQs](#) on supporting information.

Figures submitted in colour may be reproduced in colour online free of charge. Please note, however, that it is preferable that line figures (e.g. graphs and charts) are supplied in black and white so that they are legible if printed by a reader in black and white.

If an author would prefer to have figures printed in colour in hard copies of the journal, fees will be charged by the Publisher as follows:

1st figure = 150 GBP + VAT

Subsequent figures = 50 GBP each + VAT

Maps

John Wiley & Sons Ltd remains neutral with regard to jurisdictional claims in published maps. For reasons of consistency, authors are requested to use accepted standard maps as the basis for map figure drawing. Responsibility for maps rests with the author and it

is their responsibility to also provide any copyright or licence information when using maps that are not owned or created by the author (e.g. Google Maps, etc.)

Cover Image Submissions

This journal accepts artwork submissions for Cover Images. This is an optional service you can use to help increase article exposure and showcase your research. For more information, including artwork guidelines, pricing, and submission details, please visit the [Journal Cover Image page](#).

Wiley Editing Services offers a professional cover image design service that creates eye-catching images, ready to be showcased on the journal cover.

Supporting Information

Supporting information and appendices should be supplied as separate files.

Supporting information is information that is not essential to the article, but provides greater depth and background. It is hosted online and appears without editing or typesetting. It may include tables, figures, videos, datasets, etc. Click here for Wiley's FAQs on supporting information.

Species Names

Upon its first use in the title, abstract, and text, the common name of a species should be followed by the scientific name (genus, species, and authority with correct use of parentheses; date of species description is not required) in parentheses. For well-known species, however, scientific names may be omitted from article titles. If no common name exists in English, only the scientific name should be used.

Genetic Nomenclature

Sequence variants should be described in the text and tables using both DNA and protein designations whenever appropriate. Sequence variant nomenclature must follow the current HGVS guidelines; see varnomen.hgvs.org, where examples of acceptable nomenclature are provided.

Sequence Data

Nucleotide sequence data can be submitted in electronic form to any of the three major collaborative databases: DDBJ, EMBL, or GenBank. It is only necessary to submit to one database as data are exchanged between DDBJ, EMBL, and GenBank on a daily basis. The suggested wording for referring

to accession-number information is: 'These sequence data have been submitted to the DDBJ/EMBL/GenBank databases under accession number U12345'. Addresses are as follows:

- DNA Data Bank of Japan (DDBJ): ddbj.nig.ac.jp
- EMBL Nucleotide Archive: ac.uk/ena
- GenBank: ncbi.nlm.nih.gov/genbank

Proteins sequence data should be submitted to either of the following repositories:

- Protein Information Resource (PIR): georgetown.edu
- SWISS-PROT: ch/sprot/sprot-top

General Style Points

The following points provide general advice on formatting and style.

- Acronyms and Abbreviations: In general, terms should not be abbreviated unless they are used repeatedly and the abbreviation is helpful to the reader. Initially, use the word in full, followed by the abbreviation in parentheses. Thereafter use the abbreviation only.
- Units of measurement: Measurements should be given in SI or SI-derived units. Visit the Bureau International des Poids et Mesures (BIPM) website at www.bipm.fr for more information about SI units.
- Numbers: numbers under 10 are spelt out, except for: measurements with a unit (8mmol/l); age (6 weeks old), or lists with other numbers (11 dogs, 9 cats, 4 gerbils).
- Trade Names: Chemical substances should be referred to by the generic name only. Trade names should not be used. Drugs should be referred to by their generic names. If proprietary drugs have been used in the study, refer to these by their generic name, mentioning the proprietary name and the name and location of the manufacturer in parentheses.

Resource Identification Initiative

The journal supports the [Resource Identification Initiative](#), which aims to promote research resource identification, discovery, and reuse. This initiative, led by the [Neuroscience Information Framework](#) and the [Oregon Health & Science University Library](#), provides unique identifiers for antibodies, model organisms, cell lines, and tools including software and databases. These IDs, called Research Resource Identifiers (RRIDs), are machine-readable and can be used to search for all

papers where a particular resource was used and to increase access to critical data to help researchers identify suitable reagents and tools.

You will be asked to use RRIDs to cite the resources used in your research where applicable in the text, similar to a regular citation or Genbank Accession number. For antibodies, you should include in the citation the vendor, catalogue number, and RRID both in the text upon first mention in the Methods section. For software tools and databases, please provide the name of the resource followed by the resource website, if available, and the RRID. For model organisms, the RRID alone is sufficient.

Additionally, you must include the RRIDs in the list of keywords associated with the manuscript.

To Obtain Research Resource Identifiers (RRIDs):

Use the [Resource Identification Portal](#), created by the Resource Identification Initiative Working Group.

- Search for the research resource (please see the section titled “Search Features and Tips” for more information).
- Click on the “Cite This” button to obtain the citation and insert the citation into the manuscript text.

If there is a resource that is not found within the [Resource Identification Portal](#), you are asked to register the resource with the appropriate resource authority. Information on how to do this is provided in the “Resource Citation Guidelines” section of the Portal.

If any difficulties in obtaining identifiers arise, please contact rri-help@scicrunch.org for assistance.

Example Citations:

Antibodies: "Wnt3 was localized using a rabbit polyclonal antibody C64F2 against Wnt3 (Cell Signaling Technology, Cat# 2721S, RRID: AB_2215411)"

Model Organisms: "Experiments were conducted in c. elegans strain SP304 (RRID:CGC_SP304)"

Cell lines: "Experiments were conducted in PC12 CLS cells (CLS Cat# 500311/p701_PC-12, RRID:CVCL_0481)"

Tools, Software, and Databases: "Image analysis was conducted with CellProfiler Image Analysis Software, V2.0"

(<http://www.cellprofiler.org>, RRID:nif-0000-00280)"

Preprint your manuscript on Authorea

You can now opt to seamlessly preprint your manuscript at submission, through Wiley's [Under Review service](#), powered by [Authorea](#). Make your work citable and discoverable, before it is accepted or published.

To submit, login at

<https://mc.manuscriptcentral.com/jappent> and create a new submission. Follow the submission steps as required and submit the manuscript.

Preprint policy:

Journal of Applied Entomology will consider for review articles previously available as preprints. Authors may also post the [submitted version](#) of a manuscript to a preprint server at any time. Authors are requested to update any pre-publication versions with a link to the final published article. Please find the Wiley preprint policy [here](#).

Reproduction of Copyright Material

If excerpts from copyrighted works owned by third parties are included, credit must be shown in the contribution. It is your responsibility to also obtain written permission for reproduction from the copyright owners. For more information visit [Wiley's Copyright Terms & Conditions FAQ](#).

The corresponding author is responsible for obtaining written permission to reproduce the material "in print and other media" from the publisher of the original source, and for supplying Wiley with that permission upon submission.

Peer Review

This journal operates under a double-blind [peer review model](#). Papers will only be sent to review if the Editor-in-Chief determines that the paper meets the appropriate quality and relevance requirements.

In-house submissions, i.e. papers authored by Editors or Editorial Board members of the title, will be sent to Editors unaffiliated with the author or institution and monitored carefully to ensure there is no peer review bias.

Wiley's policy on the confidentiality of the review process is [available here](#).

Guidelines on Publishing and Research Ethics in Journal Articles

The journal requires that you include in the manuscript details IRB approvals, ethical treatment of human and animal research participants, and gathering of informed consent, as appropriate. You will be expected to declare all conflicts of interest, or none, on submission. Please review Wiley's policies surrounding human studies, animal studies, clinical trial registration, biosecurity, and research reporting guidelines.

This journal follows the core practices of the [Committee on Publication Ethics \(COPE\)](https://publicationethics.org/core-practices) and handles cases of research and publication misconduct accordingly (<https://publicationethics.org/core-practices>).

This journal uses iThenticate's CrossCheck software to detect instances of overlapping and similar text in submitted manuscripts. This journal also carries out integrity checks on images to check for signs of image manipulation. Read [Wiley's Top 10 Publishing Ethics Tips for Authors](#) and [Wiley's Publication Ethics Guidelines](#).

Guidelines on use of Artificial Intelligence Generated Content (AIGC) tools

AIGC tools — such as ChatGPT and others based on large language models (LLMs) — cannot be considered capable of initiating an original piece of research without direction by human authors. They also cannot be accountable for a published work or for research design, which is a generally held requirement of authorship, nor do they have legal standing or the ability to hold or assign copyright. Therefore — in accordance with [COPE's position statement on AI tools](#) — these tools cannot fulfil the role of, nor be listed as, an author of an article. If an author has used this kind of tool to develop any portion of a manuscript, its use must be described, transparently and in detail, in the Methods or Acknowledgements section. The author is fully responsible for the accuracy of any information provided by the tool and for correctly referencing any supporting work on which that information depends. Tools that are used to improve spelling, grammar, and general editing are not included in the scope of these guidelines. The final decision about whether use of an AIGC tool is appropriate or permissible in the circumstances of a submitted manuscript or a published article lies with the journal's editor or other party responsible for the publication's editorial policy. You can read more about Wiley's position [here](#).

4. After Acceptance

Image Checking

Upon acceptance of your manuscript in the Journal and prior to export to Wiley's production team, all image files (photographs, micrographs, and gel blots) will undergo an integrity check for signs of image manipulation. If an image is flagged, you may be contacted to resolve any concerns. Publication will proceed on the condition that all image files comply with the integrity checks. The journal reserves the right to rescind the acceptance decision if concerns cannot be resolved.

Wiley Author Services

When an accepted article is received by Wiley's production team, the corresponding author will receive an email asking them to login or register with [Wiley Author Services](#). You will be asked to sign a publication license at this point as well as pay for any applicable APCs.

Proofs

Authors will receive an e-mail notification with a link and instructions for accessing HTML page proofs online/with their proofs included as a pdf. Authors should also make sure that any renumbered tables, figures, or references match text citations and that figure legends correspond with text citations and actual figures. Proofs must be returned within 48 hours of receipt of the email.

Copyright & Licensing

You may choose to publish under the terms of the journal's standard copyright agreement, or [Open Access](#) under the terms of a Creative Commons License.

General information regarding licensing and copyright is available [here](#). To review the Creative Commons License options offered under Open Access, please [click here](#). (Note that certain funders mandate a particular type of CC license be used; to check this please click [here](#).)

Self-Archiving Definitions and Policies

Note that the journal's standard copyright agreement allows for [self-archiving](#) of different versions of the article under specific conditions.

Open Access fees

Authors who choose to publish using Open Access will be

charged a fee. A list of Article Publication Charges for Wiley journals is available [here](#).

Funder Open Access

Please click [here](#) for more information on Wiley’s compliance with specific Funder Open Access Policies.

Publication Charges for Color figures

Color figures may be published online free of charge; however, the journal charges for publishing figures in color in print. Upon submission of color figures, you will be sent a Color Work Agreement once the accepted paper moves to the production process. If the Color Work Agreement is not returned by the specified date, figures will be converted to black and white for print publication.

Article Promotion Support

[Wiley Editing Services](#) offers professional video, design, and writing services to create shareable video abstracts, infographics, conference posters, lay summaries, and research news stories for your research – so you can help your research get the attention it deserves.

Refer and Transfer Program

Wiley believes that no valuable research should go unshared. This journal participates in Wiley’s [Refer & Transfer program](#). If your manuscript is not accepted, you may receive a recommendation to transfer your manuscript to another suitable Wiley journal, either through a referral from the journal’s editor or through our Transfer Desk Assistant.
